### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The cited prior art of record fails to disclose or suggest a surface processing method of a sample comprises a step of etching said n-type polycrystalline silicon and said p-N type polycrystalline silicon by introducing mixed gas containing fluorine and oxygen into said vacuum container while applying periodically on-off controlled radio frequency bias voltage, in combination with the rest of the limitations of claims 21-22.

Regarding claims 24-25, the applicants have presented a persuasive argument, see page 10 of the response filed on 2/10/2006 that the cited prior art of record fails to disclose or suggest a surface processing method of a sample comprises a limitation of wherein a percentage of on-period accounts for 5 to 60% in a cycle of on-off control of said radio frequency voltage, and said sample is treated by said plasma, in combination with the rest of the limitations of claims 24-25.

The terminal disclaimer filed on 1/17/07 over come the only pending obviousness double patenting rejection.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Terminal Disclaimer***

3. The terminal disclaimer filed on 1/17/07 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of US Patent 6,660,647 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Conclusion***
